CONTENTS

Rapid estimation of market size 25
Computer aided process analysis and design 28
The uses and limitations of geometric programming .. 34
Applied physics in evaporation plants 39
A distillation column computer program 44
Characteristics of a sieve plate with downcomer 48
An introduction to pneumatic drying 55
Valve noise estimation 63
Convective heat transfer between air and a cloud of falling particles 67
Ethylene dichloride—a better solvent for pyridine extraction 69
Consistent decision rules and methods for economic analysis 117
Applications of the modular approach requiring iterative procedure 119

(Cont'd overleaf)

Applied physics in evaporating plants 123
Cavitation experiments on reciprocating positive displacement pumps 133
Reliability in process pumps 141
Glass as a material of construction in chemical plant .. 150
Ternary component efficiencies 153
Nomogram for estimating the ideal vapour heat capacity of amino-alkanes 156
The history of the six-tenths rule in capital cost estimation.. 213
The modular approach applied to the unsteady state behaviour of systems 217
The evolution of granular beds for gas filtration and adsorption 224
Adsorbent selection for gas drying 229
Factors affecting the optimisation of storage farms and distribution terminals 235
Transporting cryogenic liquids 244
Momentum transfer in solid-liquid batch fluidised beds .. 248
Nomogram to estimate vapour pressures of primary n-alkyl chlorides 250
Ethylene dichloride is unselective for lower members of saturated fatty acid series.. 251
Functional cost analysis for management 315
Carbon tetrachloride by chlorination of char 319
Modelling and optimisation of the ammonia oxidation process for nitric acid 323
Mathematical design of fixed bed adsorption equipment .. 327
Intensive mixing 330
Continuous intensive mixing 332
Some solutions to mixing problems 335
Vacuum system tubulation 337
Momentum transfer in solid-liquid batch fluidised beds. Part 2: Estimation of frictional losses 341
Nomogram for collection efficiency calculation in electrical dust precipitators 343
Project planning and control by network 401
The Battelle process plant study. 1: Objectives and research methods 406
Modelling and simulation of an alumina kiln 413
Heptene production process solves propylene peak shaving problem 418
Simple method of estimating number of stages in an adiabatic reactor 419
The solids-handling jet pump 423
Economising compressor installations 431
Heats of mixing of dimethylformamide and dimethylacetamide 439
A productivity criterion for chemical processing 497
The Battelle process plant study. 2: Project management and relations with sponsors 501
Computer control of batch processes.. 507
Design of fixed bed adsorbers. 2: Derivation of model .. 517
The selection of liquid/solid separation systems 524
Prediction of spout diameter 532
Decision-making under uncertainty 597
The methane-steam reaction 605
Aluminium fluoride from wet process phosphoric acid wastes 609
Heat transfer characteristics of an integrally-cooled sieve plate.. 619
Interfacial area in bubbling through a slot 624
Developments in column internals 631
Control of heat exchangers 637
Economising compressor installations—conclusion .. 647
Activity coefficients from boiling data by computer .. 649
Effective search for executives and senior technical staff .. 693
Optimal charging rates for batch processes 697
Coalescence and separation of dispersions in packings—a new type of packing 705
The absorption of nitrogen oxides 709
The detection of small differences in the specific surface area of powders 715
Planning for a medium sized chemical plant 781
Partial and total sulphur recovery in oil refineries 785
Mass transfer in packed columns 789
Control and instrumentation of a refinery total energy system 793
Disposal of wastes from the chemical industry 796
Nitrobenzene for fatty acid extraction 800
Mixing times in Newtonian and non-Newtonian fluids .. 803
Minimising capital investment for multi-product batch plants 861
Optimisation of the inlet temperature of absorbent in SO_3 absorber 863
The steam injection gas turbine cycle 864
Generalised computer program for short-cut distillation calculations.. 869
The cohesion and flow of particulate solids 872
Automatic weighing—its place in process control 877
The art of solids handling technology 882
Arching in storage bibs for loose materials 888
Moisture retention capacity of granular materials 894
